

The World's First **AI-Powered** Smart Locker

The Evolution Begins Here

LapSafe® are thrilled to unveil a breakthrough in
smart locker technology that will transform the way organisations manage assets

LapSafe® 

ONARKEN®AI*

The Evolution Begins Here

The game-changing innovation in smart locker technology. This next-generation system redefines how you manage assets, IT equipment, and parcel handling with unmatched intelligence and automation.

Powered by advanced AI-verification, ONARKEN®AI* streamlines workflows, enhances security, and boosts operational efficiency like never before. Whether you're loaning devices, managing returns, or facilitating secure drop-off and collection, this cutting-edge solution ensures total control, and an effortless user experience.

ONARKEN®AI* – Powered Precision with Total Control

- **AI-Driven Asset Verification:** Built-in AI to confirm the correct items are dropped off, loaned, or collected
- **Intelligent Automation:** AI ensures every return, drop-off, and collection is accurately processed, reducing errors and manual admin work
- **Ultimate Security:** Admins can set AI confidence thresholds, access logs, and review flagged cases remotely and in real-time.
- **Smart Workflow Integration:** Powered by our unique ONARKEN®AI*, our lockers can seamlessly integrate with your ITSM tools.

ONARKEN®-AI* isn't like any other locker platform. It's a fully connected smart locker solution

Know What's Inside. Every Time. Every time a locker door is shut, ONARKEN®AI* springs into action, detecting the contents of the bay. This robust verification process ensures that only the correct items are stored, enhancing security and minimising human error.

- Users receive real-time notifications when items are ready for collection or require attention
- Our lockers can offer safe charging to keep assets powered and ready for immediate deployment with 24 x 7 access
- Ensuring only authorised users gain access with robust authentication methods, including QR codes, PINs, and badge access
- Real-time reporting and automated notification streamline processes, reducing failed deliveries and increasing security
- Complete audit trails provide full visibility into locker usage, adding an extra layer of accountability

Ready to Experience the Future of Smart Lockers?

Join the next evolution of intelligent storage and automation. Discover how ONARKEN®AI* can transform your operations with unmatched security, efficiency, and innovation. *Patent Pending
