

Envoy™

Smart Locker Solutions

LapSafe® 

Welcome to LapSafe®

Storage, Charging & Smart Locker Experts

LapSafe® is the original inventor of storage and charging trolleys and has 25 years of proven innovation in the smart locker industry.

As pioneers in this space, we've been driving advancements longer and more effectively than any other provider.

Our extensive experience makes us the most reliable choice for smart locker storage and charging solutions, consistently setting the standard for security, efficiency, and innovation.

“ I chose LapSafe® after conducting some research and consulting with our internal Workspace team, who were familiar with them as a reputable vendor. ”

SoftCat

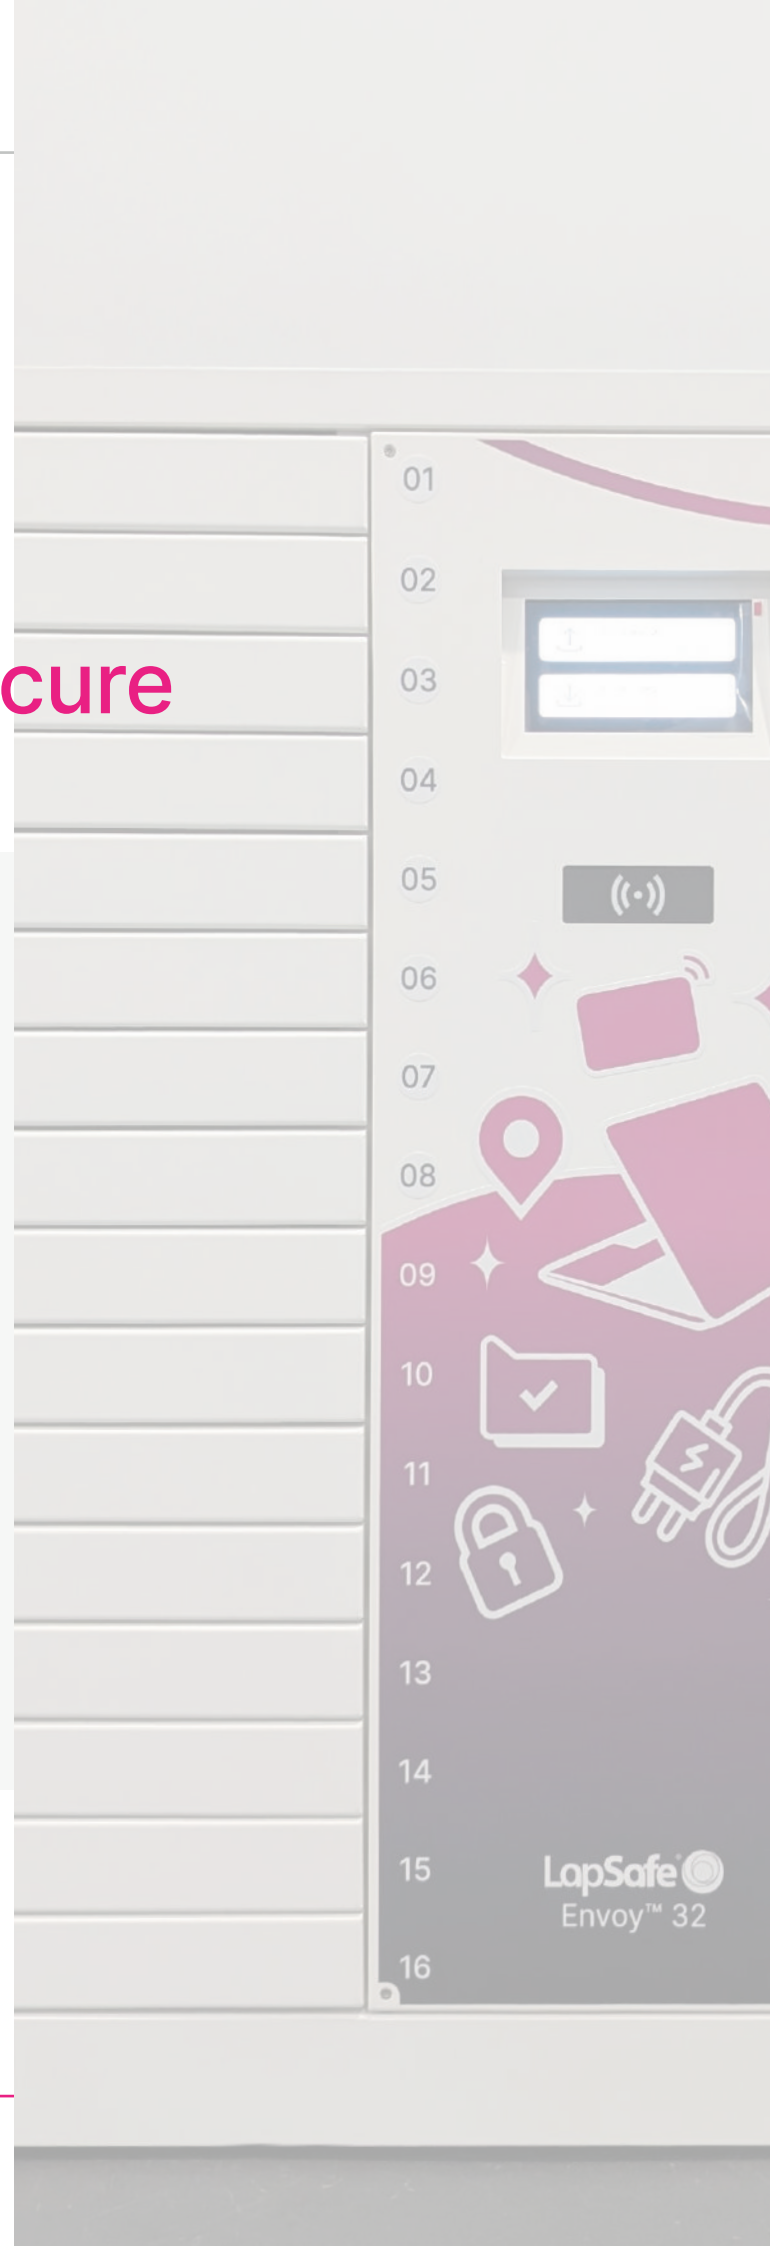

Envoy™

The Simple & Secure Smart Locker

An intuitive self-service smart locker designed for fast deployment for tablets, Chromebooks and small laptops

“Teachers no longer need to supervise device distribution, therefore they can spend more time teaching” – Northfleet School for Girls.

The Envoy™ smart locker offers a simple, self-service solution for loaning devices in a wide range of environments, including exam halls, classrooms, training centres, and workplaces. Designed to reduce delays and disruption, Envoy™ ensures that devices are fully charged, securely stored, and always ready to use.

Powered by our advanced ONARKEN® platform, Envoy™ provides full visibility with real-time reporting, audit trails, and remote management—freeing up staff time and streamlining workflows. It is a smarter way to manage device access, reduce admin, and enhance the user experience.

Fast, Reliable Access to Charged Devices

Simple To Use:

Scan ID to borrow a device – scan device tag to return

Self Service:

Users can help themselves to a device with no staff interaction

Secure Locker Bays:

Supports secure contactless transfer of charged laptops & tablets.

ONARKEN® connected:

With full audit trails, reporting and remote management

Custom Graphics:

Customise your locker with vinyl graphics

The Power of Envoy™ Smart Lockers

Improve Device Distribution

Self-service lockers simplify access for students and staff, making borrowing a device quick and easy

Save Staff Time

Automate handing out devices and free up staff time to focus on more strategic priorities.

Secure & Organised Charging

Integrated cable management ensures neat, safe storage, with a separate access door for AC adaptors

Maximise Device Investment

By storing devices in centralised smart lockers, you make them available to more people, more of the time, and therefore require fewer devices overall

Security & User Accountability

Encourage user accountability and reduce damaged or unreturned devices. With full audit trails and reporting, you know who accessed which device and when

Smarter Decisions with Real Data

With ONARKEN® software, you get full visibility of usage and trends, helping you plan, purchase, and invest more effectively

16 Bay

Envoy™ Customisable Smart Lockers

Mid Kent College, designed a range of graphics for each department.

Power Management

ChargeLine™

ChargeLine™ uses the devices own AC adaptors, USB or USB-C cables plugged into a standard socket. For safety, the sockets are secured in the central area of the locker, only accessible by administrators. The charging cables are then fed through into each bay separately and kept tidy with our cable management systems.

Power Management

All our charging solutions come with safety features built in as standard. Soft-start, Surge and Residual Voltage Protection all ensure that users, devices and lockers are kept safe.

Optimal Charging Temperature

Thermostatically controlled fans ensure the devices maintain an optimal temperature for charging. If the temperature exceeds set levels the system will cut power to protect the devices.

Ease of Access

Integrated cable management ensures neat, safe storage, with a separate access door for AC adaptors

 Find out more at lapsafe.com

Envoy™ USB-C

For rapid charging, compatible with a wide range of devices, USB-C provides efficient future-proofing for your tech needs.

LED Repeater for Charge Status: The fitted LED repeater clearly displays the charging state of every connected device. It allows you to easily monitor which devices are fully charged or still in progress, promoting efficient and convenient charging management.

LED Indicator Charging Cables: Each USB-C cable includes an LED indicator, providing visual confirmation of the charging status at a glance.

Locker Configurations & Options

Locker Bays:

Two locker options, 16 & 32 bays housed in one unit. Ideal for laptops, Chromebooks and tablets.

Display:

7" Colour information screen.

Custom Graphics:

Customise your locker with vinyl graphics.

Authentication Options:

RFID, barcode or QR code and asset tag.

16 Bay	758mm	450mm	1160mm	80kg

Bay Dimensions

	Width	Depth	Height
One Size	291mm	420mm	54mm

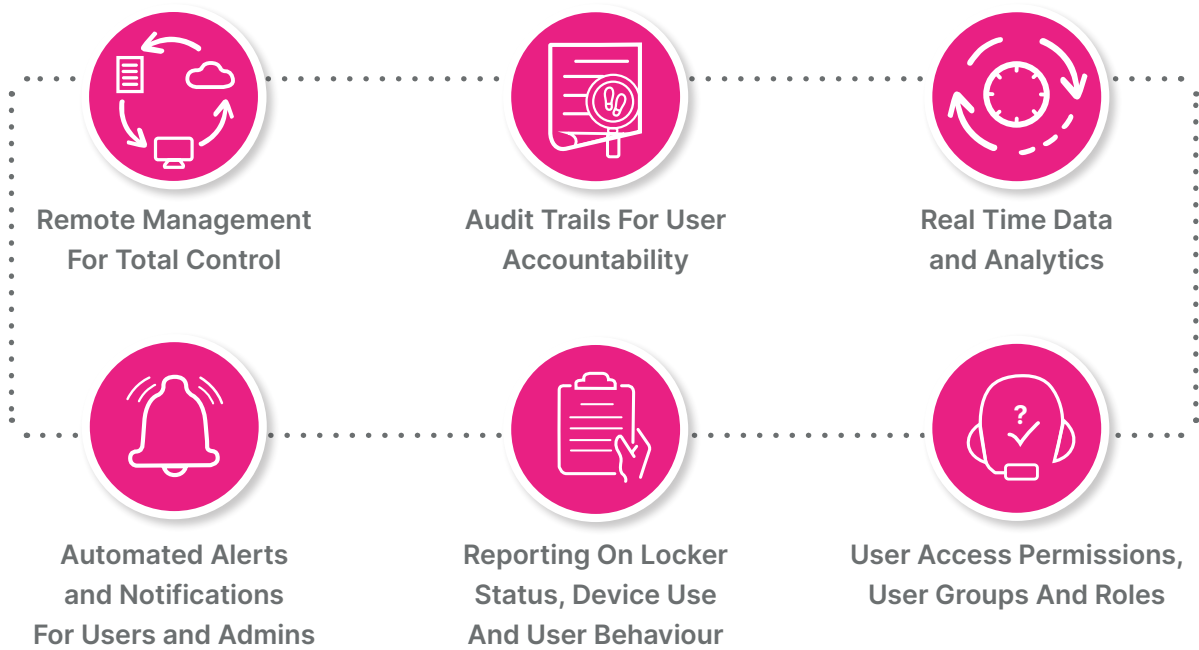

ONARKEN®

Smart Locker Management Platform

ONARKEN® is our intelligent cloud-based platform that powers all LapSafe® Smart Lockers. Bringing together every service, function, and user interaction into one powerful, easy-to-manage system.

Designed in-house by our expert development team, ONARKEN® gives you full control over your entire smart locker estate from one centralised platform.

Whether you're managing hundreds of devices, multiple sites, or a variety of services, ONARKEN® keeps everything connected, streamlined, and secure.

Every feature is purpose-built to make smart locker management smarter

Everything in One Place

Manage all your lockers, services, users, and assets in one platform, no switching between tools or systems.

Granular Control

Set precise rules for who can access what, when, and how. Assign user roles, define permissions, and create tailored workflows that fit your organisation.

Powerful Automation

ONARKEN® automates loaning, collections, returns, alerts, and more. Reducing admin while increasing efficiency and accountability.

On-Demand Access Management

Create single-use codes, timed PINs or contactless entry methods for specific users or scenarios — ideal for temporary access or one time collections.

Service Management Made Simple

Run multiple services from the same locker — from IT asset loaning to service desk swaps, drop-off and collect, and hot locker use. ONARKEN® keeps everything running smoothly.

Reporting & Insights

Access real-time usage data, power consumption stats, and user behaviour reports to inform decisions, prove ROI, and support your carbon reduction goals.

With ONARKEN®, your lockers become part of an integrated system that's easy to use, endlessly configurable, and built to grow with your organisation.

Integrations Optimising Your Organisation

Every organisation relies on a network of tools and systems, whether it's an asset management platform, user directory, or service desk software. Without proper integration, you're left with duplicated information, doubled efforts, and an over-reliance on manual tasks.

Full control over users, assets, and lockers

Manage access, bookings, and device availability directly through your existing platforms.

Smart locker services aligned with your operations

Integrate ONARKEN® with your help desk, booking, or campus management systems for a seamless user journey.

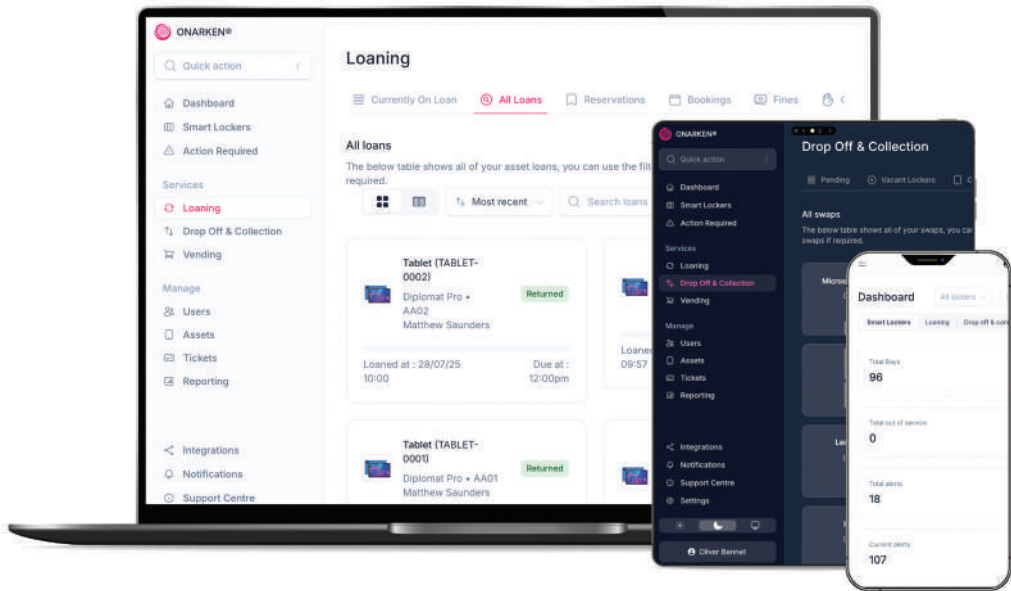

- ITSM:** Seamlessly integrate with your ITSM platforms to automate service desk workflows.
- APIs:** Integrate with your existing systems and tools for full smart system management.

Streamlined workflows and automation

Reduce manual interventions by automating asset allocation, device tracking, and user permissions.

Centralised reporting

Gain a holistic view of locker usage, device health, and service desk performance, all from your preferred reporting tools.

Some Of Our Popular Integrations Via Our APIs

LapSafe® : A British Manufacturer

Made in Britain

LapSafe® manufactures its products in the UK, and supports local business whenever possible.

We are members of 'Made in Britain', an organisation that promotes creativity, ambitious standards, and sustainable growth to the world.

Our UK Based Teams

We install, support, and deliver our products ourselves to ensure that our customers receive the best attention throughout their purchase and afterwards.

When we sell through our selected resellers, we remain the contact for service and support to ensure our end users always receive our best service.

Sustainable Construction

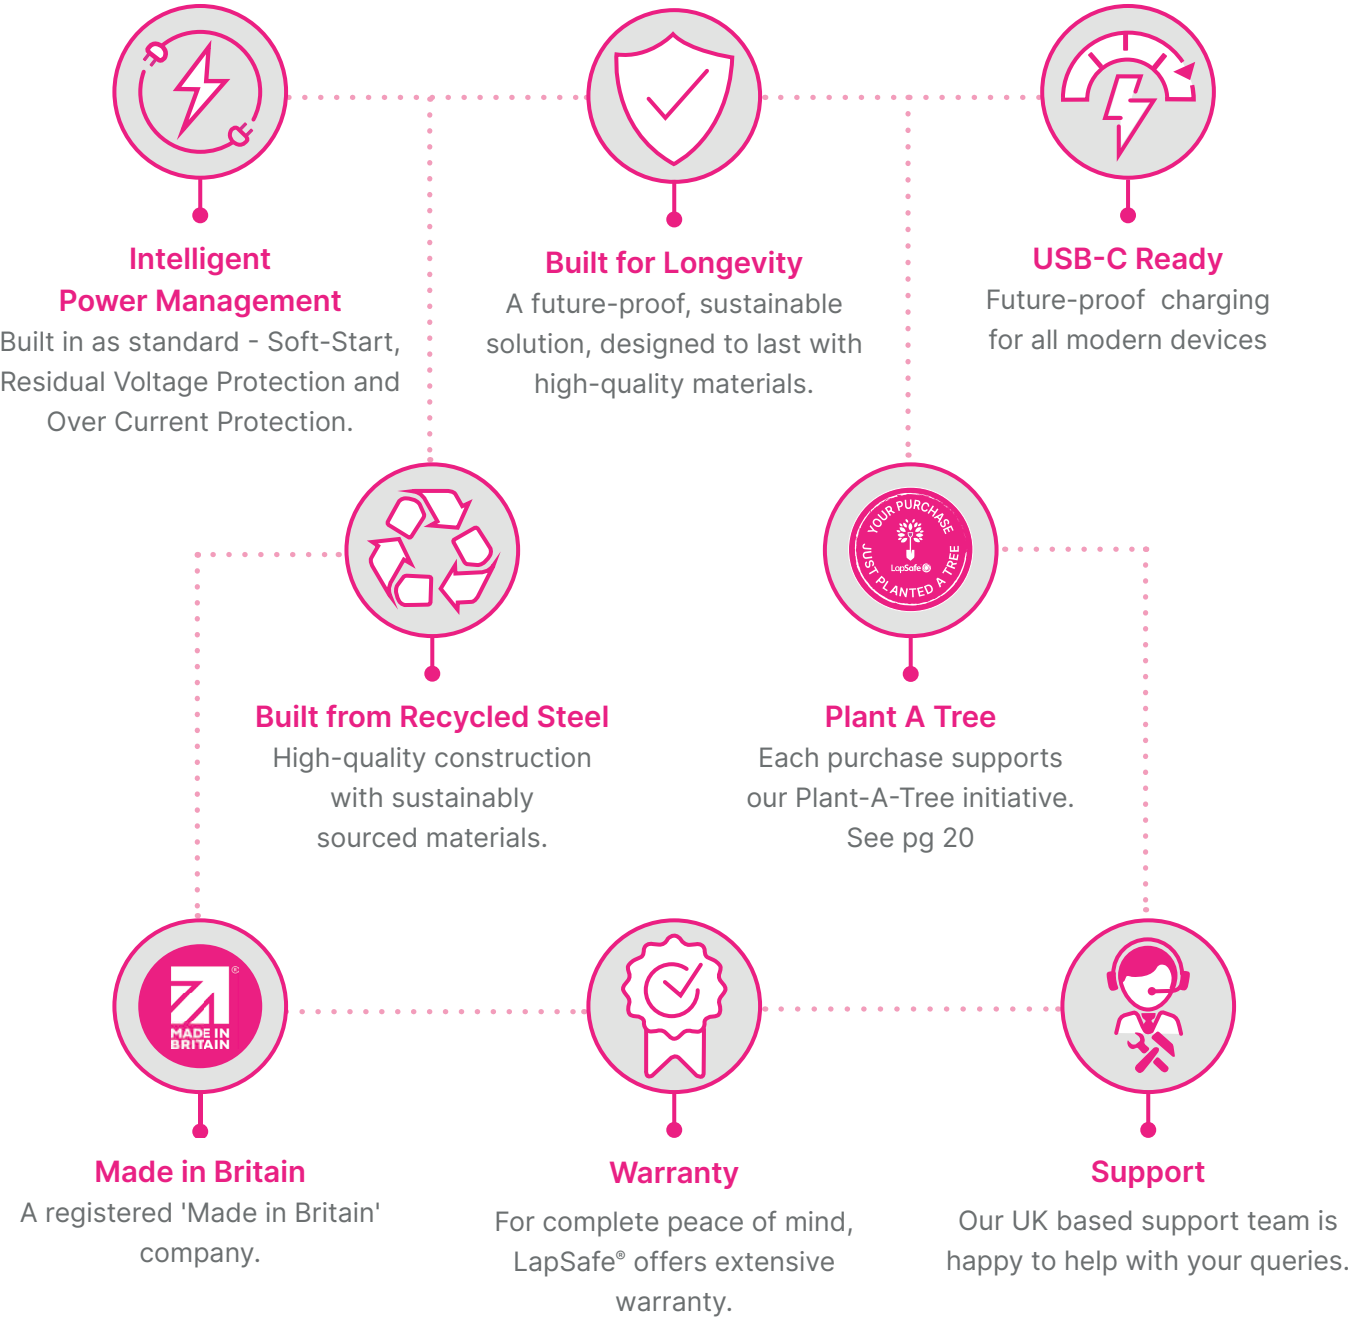

The Envoy™ is built from responsibly sourced recycled steel. All our products are built to the highest quality standards, designed to stand the test of time.

A Smart & Sustainable Choice

- UK Designed & Manufactured
- Energy-Efficient
- Long Lasting, Scalable & Future Proof Solutions
- Positive Environmental Impacts
- Working With You To Meet Carbon Zero Targets

Sustainability & Future Proofing

Planting Trees With Every Product

Plant-a-Tree

As part of our commitment to sustainability, LapSafe® will plant one tree for every trolley, locker tower or vending machine you buy.

Why It Matters

The UK needs to plant 1.5 billion trees by 2050 to meet legally binding net-zero targets.

By choosing LapSafe® you're not just investing in quality, future-proof technology, you're also making a measurable impact on the environment.

Supporting Our Customers

We'll keep track of how many trees are planted on your behalf and share updates as the project grows; Supporting biodiversity, cleaner air, and carbon capture. Helping you and your organisation reduce your carbon footprint.

Our Partners: Time4Trees

Led by land restoration specialists, Time4Trees turns underused and damaged land into thriving forests.

Their mission is to restore nature, improve air quality, and help the UK meet it's climate goals, tree by tree.

“ We’re proud to support British reforestation and help restore biodiversity. Giving our customers a simple but meaningful way to contribute to a more sustainable future with every purchase. ”

Denise Crouch, Marketing Director

LapSafe® Support

Here for you every step of the way
